1. Applicant's election with traverse of group I, species A in Paper No. 7 is acknowledged. The traversal is on the ground(s) that MPEP 821.04 and 2116.01 direct the examiner to rejoin a method of making claim to a product made claim if it *depends from or otherwise includes all of the limitations of the allowable product*. This is not found persuasive for three reasons.

Reason #1 – Amended claim 8 is not a dependent claim. Claim 1 is directed to a product. Claim 8 is directed to a method of manufacturing that refers to claim 1 in the preamble in an intended use-statement.

Reason #2 - Amended claim 8 does not include all the limitations of claim 1. Again, claim 1 is referred to in claims 8 merely as an intended use in the preamble, and therefor only portions of it that are specifically recited in the method steps are given full weight.

Reason #3 – The product claim is not allowable, therefor rejoinder is not required.

The good news for Applicant is that if claim 1 is ultimately determined to be allowable, and claim 8 is modified to positively include all of the limitations of claim 1, the rejoinder will be required.

Claims 8-11,13,15-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group or species, there being no allowable generic or linking claim.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,2 and 14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kanada et al. '755.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

4. Claims 1,2 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the published European Patent Application to Kanada (940 215).

5. Made of record but not relied on is a patent to Muller showing an indexable insert.
